NIMoSoft
## Fetal *RHD* qPCR Analysis Software

The NIMoSoft software associated with the NIMoTest® Fetal RHD qPCR kit is the tool that will undoubtedly facilitate the analysis and interpretation of results.

It ensures complete traceability of actions. It automatically generates a configuration sheet and imports it into the qPCR device. It validates experiments and interprets results and integrates them into LIMS.

Traceability
Authentified user
Plate sheet printout

Standard ISO 15189

Complete Workflow

- **Template creation 96 and 384 wells plate**
- **Template transfer to qPCR devices**

Multiple qPCR devices validated

QuantStudio 7 - Life technologies
qTOWER3 - Analytic Jena AG
LC480 - Roche Life Science
M2000rt - Abbott

- **Data analysis from qPCR devices**
- **Two level validation**
- **Export to LIMS**
